Psychology Internship Program

Cheyenne VA Medical Center
2360 E. Pershing Blvd.
Cheyenne, WY 82001
(970) 313-2147
http://www.cheyenne.va.gov/

MATCH Number: 230211
Applications Due: November 20, 2017

ACCREDITATION STATUS

The doctoral internship at the Cheyenne VA Medical Center is accredited, on contingency effective 8/18/2015 by the Commission on Accreditation (CoA) of the American Psychological Association (APA). Per the APA CoA, “accredited, on contingency is granted if and only if the program meets all standards except for the inclusion of all required outcome data on interns in the program and after program completion. To move from “accredited, on contingency” status to fully accredited, the program must provide the required data by the time two (2) cohorts have completed the program.”

Questions related to the program’s accreditation status should be directed to the Commission on Accreditation:

Office of Program Consultation and Accreditation
American Psychological Association
750 1st Street, NE
Washington, DC 20002-4242
Phone: (202) 336-5979

INTERNESHIP ADMISSIONS, SUPPORT, & INITIAL PLACEMENT DATA

Date Program Tables are updated: August 15, 2017

Internship Program Admissions

Applicants must meet the following prerequisites to be considered for our program:

1. Applicants must be enrolled and in good standing in an APA- or CPA- accredited clinical, counseling, or combined psychology program.
2. A minimum of 350 direct intervention and 50 direct assessment hours of supervised graduate level pre-internship experience.
3. Completion of comprehensive examination and proposal of their dissertation.
4. U.S. citizenship. VA is unable to consider applications from anyone who is not currently a U.S. citizen. Verification of citizenship is required following selection. All interns must complete a Certification of Citizenship in the United States prior to beginning VA training.
5. A male applicant born after 12/31/1959 must have registered for the draft by age 26 to be eligible for any US government employment, including selection as a paid VA trainee. Male applicants must sign a pre-appointment Certification Statement for Selective Service Registration before they can be processed into a training program. Exceptions can be granted only by the US Office of Personnel Management; exceptions are very rarely granted.
6. Interns are subject to fingerprinting and background checks. Match result and selection decisions are contingent on passing these screens. Please view the following link for additional information regarding the background check: [http://www.archives.gov/federal-register/codification/executive-order/10450.html](http://www.archives.gov/federal-register/codification/executive-order/10450.html)
7. VA conducts drug screening exams on randomly selected personnel as well as new employees. Interns are not required to be tested prior to beginning work, but once on staff they are subject to random selection for testing as are other employees.

Selection Process

A selection committee comprised of psychologists reviews applications. Our selection criteria are based on “goodness-of-fit” with our scholar-practitioner model. Applicants will be evaluated individually on their clinical experiences, academic performance, scholarly background, and interests. Preference will be given to applicants with interests in rural, generalist training with an emphasis on interprofessional treatment. As an equal opportunity training program, the internship welcomes and strongly encourages applications from qualified candidates, regardless of gender, age, racial, ethnic, sexual orientation, disability, or other minority status. Our internship emphasizes and promotes diversity; it is an essential component of our training program. We are committed to attracting diverse applicants and maintaining diversity within our intern cohorts. Students from diverse backgrounds (e.g., ethnicity/race, lifestyle, disability) and historically disadvantaged groups, are strongly encouraged to apply. All things being equal, consideration is given to applicants who identify themselves as veterans; as members of historically underrepresented groups on the basis of racial or ethnic status; as representing diversity on the basis on sexual orientation; or as representing diversity on the basis of disability status. This agency provides reasonable accommodation to applicants with disabilities where appropriate. If you need reasonable accommodation for any part of the application and hiring process, please notify Dr. Reinfeld by telephone or email (contact information below).

Does the program require that applicants have received a minimum number of hours of the following at time of application? Yes

Total Direct Contact Intervention Hours: 350
Total Direct Contact Assessment Hours: 50
Financial and Other Benefit Support for Upcoming Training Year

Annual Stipend for Full-time Interns: $24,014
Annual Stipend for Half-time Interns: Not Applicable
Program provides access to medical insurance for intern? Yes
Trainee contribution to cost required? Yes
Coverage of family member(s) available? Yes
Coverage of legally married partner available? Yes
Coverage of domestic partner available? No
Hours of Annual Paid Personal Time Off: 4 hours every 2 weeks
Hours of Annual Paid Sick Leave: 4 hours every 2 weeks
In the event of medical conditions and/or family needs that require extended leave, does the program allow reasonable unpaid leave to interns in excess of personal time and sick leave? Yes, in certain circumstances at the discretion of the training committee

FACILITY AND TRAINING SITES

The Cheyenne VAMC provides health care and other supportive services to an estimated 71,611 Veterans living in Wyoming, western Nebraska, and northern Colorado. In order to reach Veterans across our vast catchment area, the Cheyenne VAMC has facilities/services located throughout three states. These include the following: 1) Multi-Specialty Outpatient Clinics (MSOC) in Greeley, CO, Fort Collins, CO, and Sidney, NE; 2) a Primary Care Telehealth Outpatient Clinic (PCTOC) located in Rawlins, WY; 3) and Mobile Telehealth Clinics serving Laramie, Torrington, and Wheatland, WY, as well as Sterling, CO.

In addition to outpatient and inpatient medical services, the Cheyenne medical facility has a 32-bed Community Living Center (CLC). The CLC provides rehabilitative care to Veterans who require assistance to return to living at home or who may require longer term residential care. Inpatient hospice and palliative care services are also available. Additionally, a 10-bed residential mental health rehabilitation treatment program is currently under construction adjacent to the existing Mental Health Outpatient Clinic.

**Fort Collins MSOC (Fort Collins, CO)**

The Fort Collins MSOC provides care to a large number of Veterans in Northern Colorado and is growing fast. The outpatient clinic provides a variety of services to patients including primary care, preventive care, mental health care, and some specialty services. In addition to primary care staff, the MSOC in Fort Collins is currently staffed by mental health providers in a variety of disciplines, including psychiatry, social work, mental health counseling, and nursing. The MSOC is located approximately 50 miles south from the main campus of the Cheyenne VAMC.

**Greeley MSOC (Greeley, CO)**

The Greeley MSOC provides care to Veterans in Northern Colorado, capturing many of our more rurally located Colorado counties. The outpatient clinic offers primary care, mental health, and some specialty services. The MSOC is staffed by mental health providers from a variety of disciplines, including psychology, psychiatry, social work, licensed professional counseling, clinical nurse specialist, and nursing. The MSOC is located approximately 60 miles southeast from the main campus of the Cheyenne VAMC.

*The Greeley MSOC will move to Loveland in January 2018, with anticipated training opportunities at the new location.*
**VITAL (Veterans Integration to Academic Leadership) Program**

The VITAL Program is staffed by a Cheyenne VAMC psychologist and medication providers who serve several different university/college campuses in the northern Colorado and Wyoming areas. The program launched in January 2014 in an effort to increase access to care for OEF/OIF/OND veterans and other University veterans and has quickly become the top-performing VITAL program in the country.

**PSYCHOLOGY SETTING**

Cheyenne VA psychologists hold a number of leadership roles at the facility. Dr. Brian Daskivich is the Chief of the Mental Health Service Line (MHSL), and oversees a multidisciplinary service comprised of Psychology, Psychiatry, Social Work, Licensed Professional Counselors, Licensed Marriage and Family Therapists, Peer Specialists, Recreational Therapists, Nursing, and administrative assistants. Dr. Rebecca Bailly is the Psychology Discipline Executive. Dr. Scott Sandstedt is Program Manager of the Northern Colorado MSOCs.

Psychologists at the Cheyenne VA are embedded within various settings at the main facility, outpatient clinics, and college campuses. Psychologists maintain close interprofessional relationships, working alongside psychiatrists, social workers, psychiatric nurses, clinical nurse specialists, and medical providers in a variety of clinics.

The Cheyenne VAMC also serves as a training site for master’s level counselors, social workers, and psychology practicum students. In addition, the facility offers training to nursing and medical students.

**TRAINING MODEL AND PROGRAM PHILOSOPHY**

The Cheyenne VAMC Psychology Internship Program is based on the Scholar-Practitioner training model. The training program’s goal is to create a supportive, collegial atmosphere that is committed to training future psychologists in the scientific practice of psychology. Over the course of the internship year, the program’s aim will be to prepare interns to be strong generalist practitioners with an emphasis on evidence-based psychotherapies.

The Cheyenne VA internship training program follows the professional developmental model, in which trainees will gradually progress from close supervision to more independent functioning over the course of each rotation and throughout the year. The competencies were developed to be sequential, cumulative, and graded in complexity. It is expected that interns demonstrate growth during the training year in the identified competencies as they receive clinical supervision and ongoing feedback regarding their progress. Furthermore, interns are expected to learn to function as professional psychologists in close collaboration with other disciplines in a VA medical facility and outpatient clinics. Interns completing the program should be fully prepared for further postdoctoral training or entry-level professional positions working with adult and older adult patient populations with a variety of mental health concerns.
Profession-Wide Competencies

Our program incorporates experiential and didactic training in the following profession-wide competencies:

1) **Research** – Interns will demonstrate critical thinking, and be able to integrate scientific knowledge with clinical practice. Interns will be able to apply the current scientific literature to evaluate their practices, interventions, and/or programs.

2) **Ethical and legal standards** - Interns should demonstrate knowledge of ethical and legal principles including the APA Ethical Principles and Code of Conduct. They will show an awareness of these principles and apply them in their daily practice.

3) **Individual and cultural diversity** - Interns will demonstrate knowledge of self and others as cultural beings in the context of dimensions of diversity in assessment, treatment, and consultation. Interns should show an awareness of, sensitivity to, and skill in working professionally with diverse individuals, groups, and communities who represent various cultural and personal backgrounds and characteristics.

4) **Professional values, attitudes, and behaviors** - Interns will demonstrate sound professional judgment and responsibility with progressive independence to resolve challenging situations throughout the training year. They will conduct themselves in a professional manner across settings and contexts. Interns will demonstrate the ability to manage work load and administrative tasks, as well as complete timely documentation. Interns will develop a professional identity over the course of the internship training year, and learn how to function as a psychologist within an interprofessional team.

5) **Communication and interpersonal skills** – Interns will communicate effectively verbally, nonverbally, and in writing. These communications will be informative, articulate, succinct, and well-integrated with consideration given to the recipient of the information (e.g., patient / family, other members of the interprofessional team, etc.). Interns will demonstrate presentation skills by effectively communicating psychological principles, procedures, and/or data to colleagues, additional trainees, and other professions.

6) **Assessment** - Interns will be able to assess patients with a broad range of problems using a variety of psychological assessment instruments. Interns will gain proficiency in selecting assessment tools, conducting intake interviews, and integrating multiple sources of information (i.e., biopsychosocial history and test data) with consideration of diversity. Interns will develop case conceptualization skills and offer concrete, useful recommendations tailored to answer the referral questions.

7) **Intervention** - Interns will demonstrate the ability to provide professional entry-level skills in response to a range of presenting problems and treatment concerns, with particular attention to identifying treatment goals and providing evidence-based psychotherapies. Interns will be able to develop case conceptualizations relevant to the patient with the ability to adapt an evidence-based intervention if appropriate. Interns will...
be able to identify and manage crisis needs and/or unexpected or difficult situations. They also should be able to effectively coordinate their interventions with other members of the interprofessional team involved with the patient’s care.

8) **Supervision** - Interns will understand the ethical and legal issues of the supervisor role. Interns will develop knowledge of supervision models and apply this knowledge in direct or simulated practice. Interns will provide effective supervised supervision to less advanced students, peers, or other service providers in typical cases appropriate to the service setting.

9) **Consultation and interprofessional / interdisciplinary skills** – Interns will understand their role as a consultant and shift roles to meet presenting needs. Interns will gather appropriate data in order to answer the consultation need.

**PROGRAM STRUCTURE**

This doctoral internship program includes three 12-month full-time internship positions each of which is divided into two 6-month rotations. Interns will choose from the following major 6-month rotations based on availability: 1) General Mental Health, 2) Primary Care Mental Health Integration, 3) Psychosocial Residential Rehabilitation Treatment Program (PRRTP) for PTSD and/or SUD, and 4) Geropsychology. Other major rotations may be available pending licensed supervisor availability. Trainees also are required to participate in psychological assessment throughout the year, conducting full psychological assessments (as determined appropriate by supervising psychologist) as part of their rotations or in addition to rotations. Finally, interns will complete required telehealth training with the opportunity to deliver telehealth therapy as needed on rotations.

Interns also will choose 6-month adjunctive training experiences based upon the Training Director’s recommendations, as well as the trainee’s past experience, interests, professional goals, and identified areas of growth.

Interns are expected to commit a minimum of 40 hours per week to the internship training experience. All major rotations take place at the main facility or in one of the northern Colorado MSOCs. Additionally, if a trainee elects the VITAL program concentration, travel to college campuses will be expected. Interns can anticipate at least four hours (3 hours of individual; 1 hour of group) of supervision a week. It is expected that each intern attend all scheduled didactic presentations, individual and group supervision, and assessment and intervention (A&I) presentations. In addition, interns are encouraged to participate in other educational training opportunities that become available.

**Major Rotations (6 months, 3 days/week):**

**General Mental Health** – Interns will provide a full range of mental health treatment to Veterans diagnosed with a variety of mental health disorders. Interns will conduct intake assessments, offer individual and group psychotherapy, and participate on interprofessional teams. Evidence-based treatments will be emphasized and may
include cognitive behavioral treatment protocols for depression, anxiety, and obsessive-compulsive disorders; Integrated Behavioral Couples Therapy (IBCT); Acceptance and Commitment Therapy (ACT) for Depression; and Dialectical Behavior Therapy (DBT). Opportunities also will include observation and participation with Suicide Prevention Program and Mental Health Intensive Case Management (MHICM). Formal psychological assessments will be conducted when findings would be helpful to inform treatment.

**Primary Care-Mental Health Integration (PCMHI)** – Interns will collaborate with primary care providers in treating Veterans with a variety of needs or issues related to lifestyle and behavioral difficulties, such as medical compliance and health promoting practices, coping with illness or chronic diseases, crisis situations, coordination of care, and brief treatment of mental health concerns. PCMHI offers individual assessment and brief intervention, as well as group psychoeducation.

**Geropsychology** – Interns will collaborate actively on an interdisciplinary team in treating inpatients in the Community Living Center, which includes nursing home, rehabilitation, and palliative care/hospice beds. Trainees will strengthen their assessment and therapy skills and learn the role that psychology plays as part of an interdisciplinary team providing care to older adults and their families. Interns on this rotation will also participate in geriatric assessments involving dementia or decisional capacity evaluations. Finally, interns have the opportunity to observe direct care in the community as part of the Home-Based Primary Care (HBPC) team.

**Psychosocial Residential Rehabilitation Treatment Programs (PRRTP)** - Interns have the opportunity to work in a 10-bed residential setting for Veterans with PTSD and/or Substance Use Disorder. Treatments will include Cognitive Processing Therapy and Prolonged Exposure, among other evidence-based substance use disorder treatments.

**Yearlong Assessment (4-8 hours/week):**

**Psychological Assessment** - Interns will conduct psychological assessments, which may include personality, cognitive, neurocognitive, and intellectual measures, as determined appropriate by the supervising psychologist. Interns will be expected to complete a minimum of six psychological assessments throughout the year as part of their rotations (e.g., PCMHI, Geropsychology) or as a separate experience depending on the rotation.

**Adjunctive Training Experiences (approx. 4-8 hours/week):**

**Telemental Health (required)** – Interns will receive formalized tele-health training in the delivery of evidence-based individual and/or group psychotherapy to rural and highly rural Veterans.
Evidence-Based Psychotherapy Emphasis – Interns have the opportunity to receive focused training in one or more evidence-based treatments, such as Motivational Interviewing (MI) and Dialectical Behavioral Therapy (DBT).

**Veteran Integration to Academic Leadership Initiative (VITAL) program** – Interns will work closely with a VA psychologist placed on college campuses. This innovative program has been designed to meet the unique needs of University veterans. Interns will be involved in ongoing program development and evaluation, outreach, and the provision of psychotherapy.

VA Mental Health Administration – Interns will work closely with the Chief of the MHSL on a variety of projects. These projects may include Performance- or Quality-Improvement projects, an ongoing program-design project, or other systems-level work. This experience may include attending various meetings within the hospital, analyzing data, and presenting findings during meetings.

Committees/Other Experiences – Interns have the opportunity to take an active part in several committees and other training experiences around the hospital. These experiences vary over the year according to current need and projects. Examples include: Cheyenne VAMC Diversity Committee and the Cheyenne VAMC Dementia Committee. Time dedicated to these experiences varies and may not require 8 hours a week.

*Major rotations above may be available as adjunctive experience pending availability of supervisor

**VITAL currently unavailable

Intern Seminar Series (2-3 hours weekly requirement)

**Didactic Series** - These didactics include presentations covering various topics related to clinical and professional development. Didactics will be held face-to-face, as well as over video-conference with VA Eastern Colorado Health Care System’s psychology internship program and presenters from South Texas Veterans Healthcare System. Core topics will include the following: Assessment, Intervention, Diversity, Law/Ethics, Evidence-Based Psychotherapies, Program Development and Evaluation, Consultation, and Professional Development. Interns also will be assigned rotation-specific articles to promote the implementation of theory, research, and critical thought in their case conceptualizations.

**Assessment and Intervention (A&I) Seminar** - Each intern will present one assessment case and one intervention case to other trainees and invited staff.

TRAINING RESOURCES

Psychology interns have assigned office space with computer and telephone access at their primary rotation site. Each intern has administrative and program support for training and
consultation with electronic medical record management, telemental health, clinical applications, data management related to clinical workload, and program and facility performance improvement programs. Video-teleconferencing technologies are available to support didactics and clinical case conferences. Interns have computers available in their office space and online access to journals.

**METHOD AND FREQUENCY OF EVALUATION**

The Cheyenne VA Psychology Internship Training Program employs a multidimensional approach to program evaluation using both internal and external outcome measures. Interns receive ongoing verbal feedback regarding performance and progress, beginning with observations of baseline competencies during orientation week. Additionally, interns receive formal, written evaluations throughout the training year. The evaluations assess specific competencies required of all trainees.

At the same intervals, interns complete an evaluation of the quality of their experience of supervision. Interns also provide an overall evaluation of his/her internship experience at the end of the year. Further, interns complete an evaluation of their weekly didactic presentations. Both interim and final evaluations provided by the interns assist the program in its self-assessment/improvement processes.

**REQUIREMENTS FOR COMPLETION OF INTERNSHIP**

Program completion requires 2080 hours of internship training activities under clinical supervision (four hours weekly). Performance evaluation of and feedback to interns by clinical supervisors and other internship faculty is continuous; however, more formal evaluations are completed at established intervals throughout the training year. To maintain good standing in the program, interns will demonstrate ongoing progress and not be found to have engaged in any significant ethical wrongdoing. Remediation may be necessary if an intern performs at a level “1”. To successfully complete the program, interns must complete the required supervised activities/hours, attend the required didactics and experiential diversity activity, complete a minimum of 6 psychological assessments, not be found to have engaged in any significant ethical wrongdoing, submit required work samples, and receive a minimum level “4” rating across all competency items.

**OUTSIDE EMPLOYMENT**

The internship year is busy and demanding. Since the Psychology Service is responsible for interns’ clinical training and supervision, outside paid employment for clinical activities such as therapy or psychological assessment is discouraged. Requests for other non-clinical professional activities such as teaching, research, or non-psychological paid employment outside of normal duty hours may be considered on a case-by-case basis. Interns should not commit to any outside employment or volunteer activities of a psychological nature before getting the approval from the Director of Training. Human Resources and, possibly the Ethics Committee or Office of the Inspector General (OIG), also may be consulted to consider any possible conflicts of interest.
TRAINING STIPEND AND BENEFITS

Current stipend is anticipated to be $24,014 divided into 26 pay periods for the year. State and federal income tax and FICA (Social Security) are withheld from interns’ checks. The United States Government covers interns for malpractice under the Federal Tort Claims Act. Fringe benefits include health and life insurance at government rates, federal holidays (10 days), vacation (13 days), and sick leave (13 days). Maternity and paternity leave follows VA policy under the Family and Medical Leave Act, allowing up to 12 weeks of unpaid leave. In order to successfully complete the program, a trainee will likely be required to extend the appointment to accrue required hours.

ADMINISTRATIVE POLICIES AND PROCEDURES

The policy of the Psychology Internship Program on Authorized Leave is consistent with the national standard. Applicants are welcome to discuss this with the Director of Training. All documents are available, in advance, by request.

Due Process - All Interns are afforded the right to due process in matters of problem behavior and grievances. A due process document is distributed to and reviewed with all interns during their first week of orientation at the Cheyenne VAMC. Human Resources (HR) policies and procedures may apply in different circumstances.

Privacy policy - We collect no personal information from potential applicants who visit our website.

Self-Disclosure - We do not require interns to disclose personal information to their clinical supervisors except in cases where personal issues may be adversely affecting the intern’s performance and such information is necessary in order to address these difficulties.

LOCAL INFORMATION

Cheyenne is located in the southeastern corner of Wyoming and is the state capital and largest city in Wyoming with a population of around 62,500. Cheyenne is home to F.E. Warren Air Force Base with the 20th Air Force Command, 90th Missile Wing, and 30th Airlift Squadron as well as the Wyoming National Guard. Our ‘claim to fame’ is the annual Cheyenne Frontier Days rodeo and concert event known as ‘The Daddy Of ‘Em All’, going strong for nearly 120 years. The University of Wyoming, located on the high Laramie Plains, is in close proximity with the opportunity to attend local football games. The area offers a wealth of recreational activities including hiking, fishing, camping, cycling, golfing, rock-climbing, cross-country and downhill skiing, snowboarding and snowshoeing. The South Dakota Black Hills with Mt Rushmore and Jackson Hole with Teton and Yellowstone National Parks are within an easy day’s drive. The collegiate front-range cities of Fort Collins and Greeley, Colorado are within commuting distance with easy access for hiking, cycling, rock climbing, white water rafting, skiing, and snowboarding. Denver and Boulder, Colorado are an easy two-hour drive away. Denver is home to the Colorado Rockies, Avalanche hockey team, and Broncos Super Bowl champions. Red Rocks Park and Amphitheatre, a well-known outdoor music venue set in a rock structure, is also within driving distance for concertgoers.

**APPLICATION PROCESS**

To apply, submit the following materials electronically through the on-line APPIC Application for Psychology Internships:

- APPIC Application for Psychology Internship (AAPI)
- Detailed Curriculum Vitae – to be submitted as part of AAPI
- Three letters of recommendation – to be submitted as part of AAPI
- Graduate school transcripts – to be submitted as part of AAPI
- Academic Program Verification of Internship Eligibility and Readiness form – to be submitted by your Director of Clinical Training as part of AAPI
- Cover letter (no longer than 2 pages) addressing how your experiences to date and current career goals make you a good fit for the training offered at the Cheyenne VA Medical Center – to be submitted as part of AAPI

Any written inquiries can be submitted to:

Please read all relevant instructions carefully to ensure that transcripts, letters of recommendation, and the Academic Program Verification of Internship Eligibility and Readiness forms are submitted in a timely manner. Applications that are not completed by **11:59pm MST on 11/20/2017** will not be considered, even if portions of the application have been submitted prior to that date and time.

This training program follows all APPIC policies for the Intern selection process. This Internship site strictly abides by the APPIC policy that no person at this training facility will solicit, accept, or use any ranking-related information from any intern applicant. You are encouraged to read or download the complete text of their regulations governing program membership and the match process from APPIC’s web site. Additionally, the training program is committed to creating a supportive learning environment for individuals of diverse backgrounds, and as a federal agency, the program abides by the US government EEO and Reasonable Accommodation policies.
Rebecca Bailly, Ph.D., PTSD and Substance Use Disorder Specialist and Psychology Executive: Dr. Bailly received her Ph.D. in Clinical Psychology from the University of Wyoming in 1993 and completed her doctoral internship at Connecticut Valley Hospital in Middletown, Connecticut. She has been in private practice and taught for several years in the Clinical Psychology graduate program at the University of Wyoming. She has also worked as a civilian psychologist with the Air Force at F.E. Warren AFB. There she became familiar with military culture and evidence-based treatments for PTSD (including PE, CPT and SIT) and served as the Program Manager for the Alcohol and Drug Awareness Prevention and Treatment program. At the Cheyenne VAMC, Dr. Bailly participates on the PTSD Recovery and DBT Clinical Teams and serves as a national consultant for PE. She works in both outpatient and residential mental health programs. Dr. Bailly’s interests include evidence-based psychotherapies for PTSD, co-occurring disorders, and other complex mental health concerns; supervision and professional development; program development and evaluation; and military psychology.

Brian A. Daskivich, Ph.D., Supervisory Psychologist / Chief, Mental Health Service Line: Dr. Daskivich earned a doctoral degree in clinical psychology from the University of Montana in 1997. Dr. Daskivich has specialized experience in the areas of adolescent, young adult and family practice, health psychology, psychological assessment, and psychiatric recovery with adults. He has broad experience as a clinician and administrator in a variety of outpatient, inpatient and residential settings, including work with individuals committed to care within civil and forensic processes. He serves as the Chief for the Cheyenne VAMC’s Mental Health Service Line.

Laura Eaton, Ph.D., Training Director; Licensed Psychologist with Specialization in Geriatrics: Dr. Eaton obtained her masters in Clinical Psychology from The University of Colorado at Colorado Springs in 2002, and earned her Ph.D. in Clinical Psychology (with an emphasis on aging) from The University of Alabama in 2007. She completed her pre-doctoral internship at the Pittsburgh VA Healthcare System. Her post-doctoral training was at the South Central MIRECC where she focused on evidence-based interventions for anxiety and depression (primarily geriatric) in primary care and rural health settings. Dr. Eaton has broad experience as a clinician and administrator in a variety of outpatient, inpatient and residential settings within the VA Healthcare System. Her primary interests are interdisciplinary teams, geropsychology, and quality of care for Veterans. She primarily utilizes a cognitive-behavioral orientation and has completed VA trainings in CPT, PE, and CBT-D. She spends most of her time working with the staff and Veterans in the Community Living Center (CLC) at the Cheyenne VAMC.

Allison M. Hahn, Psy.D., Part-Time Psychologist with Specialization in Health Psychology: Dr. Hahn received her Psy.D. in Clinical Psychology from the University of Northern Colorado in 2006 and completed her APA accredited doctoral internship at Colorado State University Health Network. Dr. Hahn’s areas of specialization include health psychology, chronic disease management, health behaviors and geriatric psychology including end-of-life care (e.g., palliative care and hospice). She also has broad experience with general mental health and psychological assessment. Dr. Hahn is trained in Motivational Interviewing and the Patient Education TEACH model. She currently works for the Cheyenne VAMC as a Clinical Health Psychologist and has provided an array of services in assessment, therapy, consultation, and training.
Janine S. Kreft, Psy.D., Licensed Clinical Psychologist, Telehealth for the Fort Collins CBOC: Dr. Kreft earned her Psy.D. in Clinical Psychology from ASPP, Southern California in 2015. She completed her doctoral and postdoctoral training here at the Cheyenne VA. During her practica experience, she worked in a variety of settings including: a community outpatient center, University of California Irvine, Harbor UCLA Medical Center, and a private practice. Although her training has been mainly with adults in general mental health, areas of specialized training include: PTSD (CPT provider), substance abuse, DBT, and motivational interviewing (MI provider). Dr. Kreft recently relocated to Chicago, IL and continues to provide full-time telehealth therapy to our Veterans. She currently is an adjunct supervisor for the PTSD rotation. Dr. Kreft also has a passion for holistic and alternative approaches and works part-time in private practice.

Tamara L. Morris, Psy.D., Graduate Psychologist at the Cheyenne VAMC: Dr. Morris received her Psy.D. in Clinical Psychology from the Wisconsin School of Professional Psychology after completing her doctoral internship at the Cheyenne VA Medical Center in 2016. Dr. Morris is a generalist with specialized training in Cognitive Processing Therapy. She currently works with the PTSD recovery team, specialty mental health clinic, and provides a wide range of psychological and cognitive assessments. Dr. Morris participates on the DBT consultation team, Mental Health Staffing Pillar, New Employee Mentorship (NEM) Team, Mental Health Interdisciplinary Team, and Mental Health Diversity Committee. She has trained in a variety of settings including the VA Medical Center, community outpatient mental health, inpatient mental health, forensics, and with Primary Care Mental Health Integration (PCMHI).

Maya Pignatore, Ph.D., Licensed Psychologist with Specialty in Geriatrics: Dr. Pignatore earned her Ph.D. in Clinical Psychology from Nova Southeastern University in 2013. She completed her pre-doctoral internship with the University of Colorado, School of Family Medicine, and her postdoctoral residency at the Pittsburgh VA Healthcare System, APA-accredited Professional Geropsychology Fellowship. Dr. Pignatore primarily works under an integrated psychotherapeutic orientation. Her interests include providing and expanding services for underserved groups, primarily including older adults, sexual and gender minorities. She works with the Hospice Care Team, Outpatient Palliative Care Team, and Primary Care Mental Health Integration Program, in addition to managing the psychological testing clinic. She is co-chair of the Cheyenne VA’s Dementia Committee and leads the VISN 19 Dementia Committee, which work on improving dementia care and practices within our local facility and VISN, respectively. Dr. Pignatore also leads the MH Diversity Committee.

Greg S. Rich, Ph.D., Part-Time Home Based Primary Care (HBPC) Psychologist: Dr. Rich received his Ph.D. in Psychology from the University of Wyoming in 1989 after completing a doctoral internship at Indiana University Medical School in Indianapolis, Indiana. After working for six years at Cheyenne’s Community Mental Health Center, Dr. Rich opened a private practice office where he has worked for the past twenty-two years. In addition to his continuing work as a private practice psychotherapist, Dr. Rich joined the Cheyenne VAMC HBPC multidisciplinary team to provide home-based psychological services to seriously ill Veterans at risk for skilled nursing care placement.

Lavina L. Sanders, Ph.D., Assistant Training Director; Health Behavior Coordinator with Specialization in Health Psychology: Dr. Sanders received her Ph.D. in Clinical Psychology from the University of New Mexico in 2011 and completed her doctoral internship at the Southern Arizona VA Healthcare System in Tucson, AZ. Dr. Sanders then graduated from the Postdoctoral
Fellowship at Tripler Army Medical Center in 2013, where she specialized in Health Psychology, and also completed an M.S. in Psychopharmacology through the University of Hawaii at Hilo. She worked for over 2 years as a Behavioral Health Consultant for the Primary Care-Mental Health Integration program at the South Texas VA Healthcare System in San Antonio before transferring to Cheyenne to be the Health Behavior Coordinator. Dr. Sanders’ areas of specialization include: health psychology; training Primary Care teams in use of Motivational Interviewing; and management of health conditions affecting psychological factors (i.e., diabetes, hypertension, cancer, chronic pain; weight management). She also has extensive training in brief interventions/assessment (i.e., MI and CBT) to address multiple conditions often seen in Primary Care. Her theoretical orientation is primarily cognitive-behavioral with an emphasis on utilizing the spirit of MI. She currently works as the Health Behavior Coordinator in the Health Promotion/Disease Prevention program, where her goal is to promote healthy living from a population-based perspective.

Scott D. Sandstedt, Ph.D., Supervisory Psychologist/Northern Colorado MSOC Program Manager: Dr. Sandstedt earned his doctoral degree in Counseling Psychology from the University of Missouri in 2004. He completed his doctoral internship at the Harry S. Truman Memorial Veterans Hospital in Columbia, MO, where he also served as a staff psychologist, internship supervisor, and Clinical Manager for the Behavioral Health Service. Areas of clinical experience include substance abuse treatment, mental health triage, and Primary Care Mental Health Integration. Dr. Sandstedt’s theoretical orientation is integrated, informed primarily by both psychodynamic and cognitive behavioral paradigms.

Mark E. Schutter, Ph.D., C&P Examiner: Dr. Schutter earned his Ph.D. in Psychology from the University of Oklahoma in 1995. He completed his doctoral internship at the Norfolk Regional Center in Norfolk, Nebraska, serving on an interdisciplinary treatment team in a psychiatric inpatient setting, and providing assessment and treatment for patients in the state hospital, two community mental health centers, and a state veteran’s home. From 2001 to 2008, he served as Superintendent of the 550 bed Larned State Hospital in Larned, Kansas, which operated the statewide forensic program, the statewide sex predator treatment program, and inpatient services for civilly committed adults, adolescents, and children. In 2008, he was appointed Superintendent of the Logansport State Hospital in Logansport, Indiana, a 350 bed facility which hosted the state wide forensic program, as well as inpatient treatment for adults and developmentally disabled populations. From 2010 to 2014 he was the Director of Mental Health at the Cheyenne VA Medical Center. The service has been able to increase reimbursement for clinical services, streamline operations, enhance service quality, expand the number of Veterans served and launch new services like tele-mental health, plan for construction of an inpatient unit, increase staff training, and improve staff and patient satisfaction. Dr. Schutter also served as the Acting Associate Chief of Staff for Ambulatory Care. Under his leadership, appointment wait times in primary care and dermatology clinics decreased, while clinical quality measures improved. Mark Schutter joined the Executive Leadership in April 2015. As Group Practice Manager (GPM) he oversaw the community based outpatient clinics (CBOCs), Cheyenne Ambulatory Care, and Primary Tele-health which also provides care in Rawlins, WY. He currently serves as a Compensation and Pension Examiner.

Delia Sosa, PsyD, Graduate Psychologist, VITAL Program Coordinator: Dr. Sosa earned aPsyD in Clinical Psychology from Pacific University School of Graduate Psychology in 2016. She completed her doctoral internship at the Cheyenne VA Medical Center where she is also continuing her postdoctoral training. Dr. Sosa serves as the VITAL (Veterans Integration to
Academic Leadership) Program Coordinator, focused on bringing VA mental health services in the form of evidenced-based practices, training opportunities, and outreach to five different colleges/universities in Wyoming and Northern Colorado. Dr. Sosa’s interests and areas of specialized training include: PTSD, multicultural therapy, and working with the Latino/Spanish-speaking population.

**Tiah Terranova, Psy.D., LP, Part-Time C&P Examiner:** Dr. Terranova obtained her doctorate in clinical psychology from the Illinois School of Professional Psychology at Argosy University/Chicago. Dr. Terranova has experiences working with veteran, correctional, University, inpatient, private practice, long term care, primary care, and pediatric populations. Dr. Terranova works from a systems perspective and has experience providing supervision to doctoral level interns and postdoctoral candidates. Dr. Terranova has served in multiple roles at the Cheyenne VAMC, including the Acting Suicide Prevention Coordinator and team member for Palliative Care, Homeless Team, TBI and Psychological Assessment. She currently functions as a Compensation and Pension examiner.

**Rachel Wells, Ph.D., Part-Time HBPC Psychologist:** Dr. Wells received her Ph.D. in clinical psychology from Washington University in 2005. There, she specialized in clinical health psychology. She completed her internship at Rush University Medical Center. She has worked in a group private practice and for the VA. At the VA, she has provided treatment for substance dependence, PTSD, and co-morbid disorders. Dr. Wells has received the VA’s certification to provide Prolonged Exposure treatment for PTSD. She is also a member of the Motivational Interviewing Network of Trainers, and enjoys conducting MI with Veterans. Currently, she is a training consultant for the VA’s national initiative to train clinicians in MI and MET. She also provides psychotherapy and cognitive screenings to Veterans in the Home Based Primary Care Program. Dr. Wells is also certified in the Resources to Enhance All Caregiver’s Health (REACH) intervention.
